SUMMARY

Biomedical Engineering student specializing in CAD-driven design and prototyping of medical devices, with hands-on experience in prosthetics development and ergonomic system design. Seeking a Summer 2026 internship/Co-op in medical device RD or hardware engineering.

EDUCATION

Rutgers University

New Brunswick, NJ

Bachelor of Science in Biomedical Engineering (GPA: 4.0)

Aug. 2025 – May 2029

- Honors College of Engineering, Dean's List, Dean's Scholarship
- Relevant Coursework:** Multivariable Calculus, Statics, CAD for Engineering, Intro to Biomedical Engineering, Biomedical Engineering Systems Physiology

EXPERIENCE

RU-ENABLE

Aug. 2025 – Present

Engineering Governing Council (EGC) Representative

New Brunswick, NJ

- Served as the EGC Representative, pushing for funding for prosthetic materials and coordinating inter-departmental logistics
- Collaborating with a team of 8+ members to ideate and prototype 3 unique prosthetic designs tailored for underprivileged communities
- Developed and refined 4+ iterative CAD prototypes for prosthetic limbs, incorporating feedback from senior members to improve functional durability by ~15%

Rutgers Formula Racing

Aug. 2025 – Present

Ergonomics Team Member

New Brunswick, NJ

- Engineered a 3-piece modular system using 3D printing (PLA) to test throttle pedal angles; reduced testing setup time by ~25% with a quick-change design
- Utilized SolidWorks to perform FEA (Finite Element Analysis) on 4 critical ergonomic components, ensuring a 2x safety factor while optimizing for driver weight
- Produced 12 manufacturing-ready engineering drawings with standardized tolerances and clear dimensioning to support machining and assembly
- Focusing on throttle, steering, and driver interface systems to optimize comfort and performance

Next Generation Pediatric Urgent Care

Sep. 2024 – Aug. 2025

Medical Assistant

Bergenfield, NJ

- Facilitated clinical workflow for 100+ patients weekly, accurately recording vitals and medical histories in EMR software
- Administered 15+ diagnostic tests daily (COVID, Flu, Strep) for a diverse patient demographic ranging from infants to young adults
- Performed administrative tasks, checked in & scheduled ~40 patients per day, and updated medical records

PROJECTS

3D Printed Wrist Brace | SolidWorks

Jan. 2026 – Present

- Developing a parametric SolidWorks model for a custom-fit wrist brace, engineered to provide rigid immobilization
- Utilizing patient-specific anthropometric data to generate 3D-printable geometries, ensuring a tailored fit

Universal Design Toy Boat | Onshape

Sep. 2025 – Dec. 2025

- Modeled an accessible toy boat utilizing the 7 Principles of Universal Design to ensure inclusive use for all children
- Optimized internal shell volume by reducing material mass by 20%, creating a dedicated housing for a low-voltage LED system while maintaining structural integrity

SKILLS

Software & Tools: SOLIDWORKS (CSWA Certified), MATLAB, R, Onshape, Microsoft Office Suite

Technical Skills: CAD Modeling, Finite Element Analysis (FEA), 3D Printing, Parametric Design, Engineering Drawings

Certifications: SOLIDWORKS Certified Design Associate (CSWA), AHA BLS/CPR Certified
